About Us: Crafting Beauty in Concrete and Bricks Showroom!

At Good Hand Stones and Concrete Flooring LLC, we are passionate about transforming ordinary spaces into extraordinary masterpieces. Our showroom is your gateway to a world where creativity meets craftsmanship, and where your imagination comes to life through the versatility of decorative concrete and bricks.

Established with a vision to redefine the landscape of architectural design, we pride ourselves on delivering excellence through our unparalleled products. Good Hand SCF has been a pioneer in the industry for 10 years. We are more than just manufacturers; we are creators, innovators, and collaborators, dedicated to delivering excellence in every project.

Step into our showroom and immerse yourself in a diverse range of decorative concrete and bricks options. From sleek and modern designs to rustic and traditional aesthetics, we offer an extensive selection to suit every style and preference. Whether you're looking to enhance your home, office, outdoor area, or commercial space, we have the perfect solution for you.

What sets us apart is our relentless pursuit of perfection. Each of our concrete and brick creations is meticulously crafted by skilled artisans who pour their expertise and passion into every detail. From intricate patterns to bold textures, our products exude character and charm, breathing life into any environment they grace.

Moreover, sustainability lies at the heart of everything we do. We are committed to eco-friendly practices, using responsibly sourced materials and employing innovative techniques to minimize our environmental footprint. By prioritizing sustainability, we not only protect the planet but also ensure that our creations endure for generations to come.

Our Products:

Explore our comprehensive range of products, including:

- Exposed Aggregate Concrete
- Stamped Concrete
- Bricks
- Micro Topping
- Pool Renders
- Stones
- Tiles
- Sanitary Ware
- And much more!

Visit Us Today:

Experience the endless possibilities of decorative concrete and bricks firsthand at Good Hand SCF Showroom. Whether you're a homeowner, architect, designer, or contractor, We invite you to unleash your creativity and explore the limitless potential of our Products.

Transform your space with Good Hand SCF—where innovation meets imagination, and ordinary becomes extraordinary. We look forward to welcoming you soon!

Product Details: Exposed Aggregate

Applications

- Enhance architectural features
- Highlight demarcation zones
- Identify underground utilities and services
- Building facades
- Textured concrete
- Precast

Advantages

- Through-coloured edge when shuttering is removed
- Available in 10mm and 20mm aggregate size
- An integral through-colour
- Gives a long lasting and fade resistant inbuilt decorative solution
- Standard colours available
- A range of proprietary mixes available for printing
- Highly precise batching to ensure colour accuracy

Characteristics

- The depth of etch exposure can be varied
- Four different grades of retarder are available, from a very light etch to a medium etch. Each grade of retarder is colour coded and contains an integral curing agent that will protect and cure the concrete until the washing process is complete.
- When integral colour concrete is used, a two layer construction can be considered for large pavement areas in excess of 125mm thick. The minimum depth of topping is 70mm. Exposed is available in standard colours. Where the intensity and colour of the aggregate at the surface of the exposed aggregate paving is prominent, colours and colour in the cement matrix can be quite subtle as it is mainly the aggregates that are on view.

"Exposed Aggregate is available in several colors"

"Exposed aggregate is made on-site."

Technical Data Sheet

Exposed Aggregate Section

Exposed Aggregate

Material Submittal & Details

List of material: -

- Polythene Sheet
- Steel Mesh
- Exposed Aggregate Mix
- Shuttering
- Surface Retarder
- Sealer

Material	Physical Specifications	Physical Specifications
Polythene Sheet	Solid	1000 Gauge
Steel Mesh	Solid	6 mm Diameter
Exposed Aggregate Mix	Solid	As per mix design
Shuttering	Solid	9,12,18 mm
Surface Retarder	Liquid	See Below
Sealer	Liquid	See Below

Technical Details

Surface Retarders

- The surface retarder should be applied whilst the concrete surface still has a sheen using a spray at 4 bar pressure.
- There should not be any standing bleed water but the concrete surface must not be allowed to dry.
- It is important to ensure complete coverage of retarder, (4 – 5m² per litre) excess retarder is not a problem.
- Protect surface from rain immediately after applying a retarder.

Pressure Washing

- Pressure washing time after finishing the concrete, will vary depending on weather conditions.
- Use an industrial power washer with a minimum of 120 bar at the spray head.
- Keep the spray head close to the surface of the concrete, cleaning a small area thoroughly at one time.
- Once the complete area has been done in this way, a final overall wash with the nozzle at a distance from the surface should be given to wash away any final residues.

Sealing

- You've finally installed the decorative concrete masterpiece of your dreams. Maybe it's a pattern-stamped pool deck or patio, an interlocking paver driveway, an acid-stained floor, or an exposed aggregate walkway.
- Protecting and properly maintaining that concrete will keep it looking spectacular for many years to come while extending its service life. And even if the surface begins to show wear after years of exposure to traffic and the environment, you can often restore its original beauty with special cleaning, stain removal, and polishing products.

Method of Statement

List of material: -

- Checking the surface preparation and site for our work.
- Road base application with compaction, if required.
- Shuttering work with wooden plywood, as per design.
- Application of bonding agent if required.
- Application of welded steel mesh.
- Application of Exposed Aggregate Mix as per approved mix design, Color and aggregate type.
- Waiting until the bleeding water of the concrete leaves from the concrete surface.
- Application of Surface Retarder then trowels smoothly.
- Washing of the surface after 24 hours with a pressure pump.
- Making the control joint approximately after every 3x3 Mtr or as per the design requirement.
- Application of two coats of A-Z Super Sealer.

Storage & Handling Requirements

- Store and handle materials in accordance with manufacturer's instructions.
- Keep materials in the manufacturer's original, unopened containers and packaging until application.
- Store materials in a clean, dry area indoors.
- Store materials out of direct sunlight.
- Keep materials from freezing.
- Protect materials during storage, handling, and application to prevent contamination or damage.
