## **FREEDOM TO CHOOSE, ANYWHERE.**

Choosing the desired color and texture of exposed aggregate concrete has always been restrained by the available ready-mix concrete raw materials. No more. With TopCrete 700, thanks to its thin set nature, the designer is free to customize the mix of matrix color and decorative aggregates regardless of the project location.

**PICK AND CHOOSE** as you desire from a wide range of colored high-quality natural and luminous aggregates in different sizes ranging from a few millimeters to 10 mm or larger. enabling the easy production of finishes ranging from acid etched to full exposed. And unlike customary exposed-aggregate concrete where the uncolored aggregates of the concrete have to be visible, only the selected decorative aggregates show through, thereby producing a more appealing and controlled appearance.

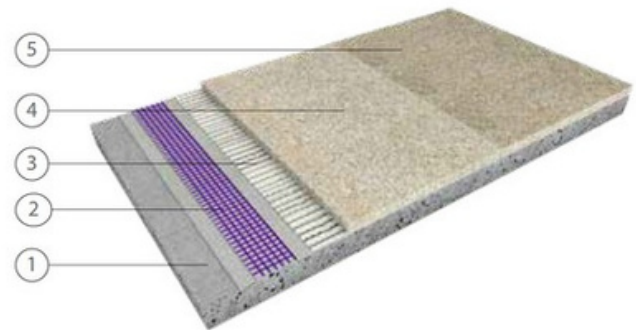

## EASY HORIZONTAL OR VERTICAL APPLICATION.

Composed of a special hydraulic binder, TopCrete 700 is mixed with the selected colored aggregates and applied in thicknesses as little as 8mm, depending on the size of the aggregates. Finished by simple washing for a textured surface without the need for a retarder or messy high-pressure washing, or choose to grind or sand-blast for a smoother finish.
