## About Us: Crafting Beauty in Concrete and Bricks Showroom!

At Good Hand Stones and Concrete Flooring LLC, we are passionate about transforming ordinary spaces into extraordinary masterpieces. Our showroom is your gateway to a world where creativity meets craftsmanship, and where your imagination comes to life through the versatility of decorative concrete and bricks.

Established with a vision to redefine the landscape of architectural design, we pride ourselves on delivering excellence through our unparalleled products. Good Hand SCF has been a pioneer in the industry for 10 years. We are more than just manufacturers; we are creators, innovators, and collaborators, dedicated to delivering excellence in every project.

Step into our showroom and immerse yourself in a diverse range of decorative concrete and bricks options. From sleek and modern designs to rustic and traditional aesthetics, we offer an extensive selection to suit every style and preference. Whether you're looking to enhance your home, office, outdoor area, or commercial space, we have the perfect solution for you.

What sets us apart is our relentless pursuit of perfection. Each of our concrete and brick creations is meticulously crafted by skilled artisans who pour their expertise and passion into every detail. From intricate patterns to bold textures, our products exude character and charm, breathing life into any environment they grace.

Moreover, sustainability lies at the heart of everything we do. We are committed to eco-friendly practices, using responsibly sourced materials and employing innovative techniques to minimize our environmental footprint. By prioritizing sustainability, we not only protect the planet but also ensure that our creations endure for generations to come.

## Resin Bound

# Technical Data Sheet

## Resin Bound

# Resin Bound Flooring System

## DESCRIPTION

A decorative outdoor floor systems composed of solvent free binder and colored or natural aggregate to create multiple decorative appealing designed floors, it has high permeability, hygienic and good adhesion to concrete and cement floors, Resin Bound has a chemical and great anti-slip properties.

## Application

Garden floors - patios - public places - showrooms and next to swimming pools

## Physical Properties

Solid Content	100%
Pot Life	45 mins
Flash Point	Non- flammable
Compressive Strength (ASTM C109)	55 N/mm2
Coverage	2kg binder: 20 kg aggregate/1 m2/ thickness 1 cm
Application temperature	Under 10°C or over 35°C

## Advantages of Resin Bound

### **Easy application:**

single-component formulation for straightforward installation

### **High adhesion**

excellent bonding to various substrates.

### **UV resistance:**

maintains color and appearance even in outdoor conditions.

### **Flexibility:**

absorbs minor substrate movements without cracking.

### **Cost-effective:**

ideal for budget-conscious projects.

## Resin Bound System Properties

### **High mechanical strength:**

withstands heavy traffic without deterioration.

### **Durability:**

resistant to abrasion, impact, and weather changes.

### **Customizable aesthetics:**

available in a wide variety of colors and textures.

### **Slip resistance:**

ensures safety on wet or slippery surfaces.

### **Water permeability:**

perfect for outdoor applications requiring drainage.

# Installation Process for Resin Bound

## 1. Surface Preparation

### For firm or concrete surfaces:

Ensure the surface is clean, dry, and free from dust, grease, or other contaminants.

Repair any cracks or irregularities before starting.

Apply PREPOX (epoxy primer) to ensure proper adhesion and allow it to dry for 12 to 24 hours.

### For surfaces requiring leveling:

Place the cellular grid units on the prepared and consolidated surface, with the spikes facing downward.

Fill the grids to the top of the cells with stones measuring 5 to 10 mm.

## 2. Material Mixing

Thoroughly homogenize Component A before mixing it with Component B using a low-speed electric mixer (300-400 rpm). Avoid introducing air into the mixture.

Gradually add the aggregates, ensuring uniform distribution. The recommended ratio is 1:12 between resin and stone.

## 3. Coating Application

Apply Resin Bound 2C evenly over the prepared surface using specialized tools. Work quickly to prevent the mixture from hardening before completion. Compact and smooth the surface, ensuring uniform distribution of the stone aggregate and removing any air bubbles.

## 4. Curing and Finishing

Allow Resin Bound to cure for 48 hours, ensuring it remains dry during this time
