About Us: Crafting Beauty in Concrete and Bricks Showroom!

At Good Hand Stones and Concrete Flooring LLC, we are passionate about transforming ordinary spaces into extraordinary masterpieces. Our showroom is your gateway to a world where creativity meets craftsmanship, and where your imagination comes to life through the versatility of decorative concrete and bricks.

Established with a vision to redefine the landscape of architectural design, we pride ourselves on delivering excellence through our unparalleled products. Good Hand SCF has been a pioneer in the industry for 10 years. We are more than just manufacturers; we are creators, innovators, and collaborators, dedicated to delivering excellence in every project.

Step into our showroom and immerse yourself in a diverse range of decorative concrete and bricks options. From sleek and modern designs to rustic and traditional aesthetics, we offer an extensive selection to suit every style and preference. Whether you're looking to enhance your home, office, outdoor area, or commercial space, we have the perfect solution for you.

What sets us apart is our relentless pursuit of perfection. Each of our concrete and brick creations is meticulously crafted by skilled artisans who pour their expertise and passion into every detail. From intricate patterns to bold textures, our products exude character and charm, breathing life into any environment they grace.

Moreover, sustainability lies at the heart of everything we do. We are committed to eco-friendly practices, using responsibly sourced materials and employing innovative techniques to minimize our environmental footprint. By prioritizing sustainability, we not only protect the planet but also ensure that our creations endure for generations to come.

Our Products:

Explore our comprehensive range of products, including:

- Exposed Aggregate Concrete
- Stamped Concrete
- Bricks
- Micro Topping
- Render System
- Stones
- Tiles
- Sanitary Ware
- And much more!

Visit Us Today:

Experience the endless possibilities of decorative concrete and bricks firsthand at Good Hand SCF Showroom. Whether you're a homeowner, architect, designer, or contractor, We invite you to unleash your creativity and explore the limitless potential of our Products.

Transform your space with Good Hand SCF—where innovation meets imagination, and ordinary becomes extraordinary. We look forward to welcoming you soon!

Technical Data Sheet

Our Microtopping Process Creates
a Strong Chemical Bond to any Solid Surface

Microtopping

Micro Topping is versatile and robust, allowing it to be applied in various systems depending on the substrate condition or intended use.

Whether required on new concrete floors or for renovation projects on tile or parquet, a suitable design is available that will provide an attractive yet durable surface.

We design and apply it on both horizontal and vertical surfaces. We work with a wide range of high quality materials for micro topping. We carry out at stages of construction and make application of self levelling floor if it is necessary.

Method of Statement

1. Scope of Work

- This Method of Statement covers the preparation and application of Microtopping (Microcement) by Good Hand Stones & Concrete Flooring LLC. Microtopping is a cement-based thin-coat overlay applied to floors and walls to deliver a seamless, contemporary concrete aesthetic with high durability.

2. Product Description

- Material: Polymer-modified cementitious micro-screed
- Thickness: 2 mm – 4 mm (multi-coat system)
- Application: Floors, walls, stairs, wet areas (bathrooms, kitchens)
- Finish: Smooth, sand, concrete effect – matte or satin sealer
- Starting Price: From AED 140 per SQM

3. Pre-installation requirements

3.1 Substrate Conditions

- Substrate must be structurally sound, flat (max. 3 mm deviation over 2 m), clean, and fully cured.
- New concrete or screed substrates must have a minimum curing period of 28 days.
- Moisture content of the substrate must be below 3% (measured with a moisture meter).
- Existing tiles, vinyl or painted surfaces must be assessed for adhesion.

3.2 Environmental Conditions

- Ambient temperature must be between 10°C and 30°C during application and curing.
- Avoid direct sunlight, draughts, or high humidity during application.
- Protect the area from foot traffic and dust throughout the curing process.

4. Application Procedure

- Mechanically abrade or shot-blast the substrate to open the surface and improve adhesion.
- Repair any cracks, holes or surface defects with a suitable repair mortar. Allow to cure fully.
- Apply a penetrating primer (e.g. epoxy or acrylic primer) and allow to become tack-free.
- Mix Microtopping component A (liquid) and component B (powder) in the correct ratio using a slow-speed drill and paddle mixer until smooth. No lumps.
- Apply the first base coat (approx. 1.5 mm) with a flexible stainless steel trowel in sweeping strokes. Embed fibreglass mesh tape at all joints and corners whilst the material is wet.
- Allow the first coat to cure for 4–6 hours (or as per manufacturer's data sheet). Lightly sand with 120-grit paper and vacuum dust.
- Apply the second coat (finish coat, approx. 1–1.5 mm) with a clean trowel, working in consistent, overlapping arcs to minimise trowel marks. Feather edges to zero.
- Allow to cure for 12–24 hours. Lightly flat the surface with fine sandpaper (180–220 grit) and remove all dust.
- Apply a first coat of two-component polyurethane or water-based sealer using a roller or flat applicator. Allow to dry.
- Apply a second sealer coat perpendicular to the first. For wet areas, apply a minimum of three sealer coats.
- Allow full cure of 48–72 hours before light foot traffic; 7 days before full use.

4. Quality & safety

- Perform a test panel (minimum 0.5 x 0.5 m) before full application for client colour and texture approval.
- PPE required: nitrile gloves, knee pads, safety boots, dust mask (P2), and eye protection.
- Sealer must be applied in adequate ventilation; solvent-based products require respirator use.
- Final surface to be free from pinholes, delamination, colour inconsistency, or trowel ridges.
- Advise client on maintenance: pH-neutral cleaners only; avoid abrasive pads.
